COVID-19

Our plan

We have secured enough of the vaccine for everyone, and it's free

We've secured enough Pfizer vaccine for everyone in New Zealand aged 16 and over, to get the two doses they need to be protected. Getting the vaccine is free for everyone, regardless of your residency or citizenship status.

How the vaccine works

The vaccine works by teaching your immune system to recognise and fight off the virus. It doesn't contain the virus, or anything that can affect your DNA. This means the vaccine can't give you the disease.

How we know it's safe

Medsafe (New Zealand's medicines safety authority) only grants consent for a vaccine to be used in New Zealand once they are satisfied it's safe and effective to use.

All COVID-19 vaccines will go through the same safety steps, and must meet the same robust standards. There have been no shortcuts in granting approval.

How the rollout works

We're rolling out the vaccine in stages. We've created four groups that everyone in the country aged 16 and over will fall under.

Groups 1 and 2 - We started by protecting those most at risk of catching COVID-19 or most at risk if they do get it, including: Border, MIQ and high-risk frontline workers; those living in long-term residential care, and older Māori and Pacific people being cared for by whānau, and those at high risk living in Counties Manukau DHB area. This reduces the risk of future outbreaks and lockdowns.

Group 3 - Next, we'll vaccinate other people most at risk of getting seriously sick.

Group 4 - Finally, we'll protect everyone else in Aotearoa aged 16 and over.

Your plan

1. Find out what group you're in

Go to [Covid19.govt.nz](https://www.covid19.govt.nz) to find out which group you are in. People at greater risk will get the vaccine first.

2. Your appointment

Groups 1 and 2 – before June 2021

Groups 1 and 2 will be invited by their local health provider or employer. There's no need to call anyone. We'll contact you.

Group 3 – from May 2021, Group 4 – from July 2021

We'll let you know when to take action. Keep an eye out for more information. We will have a range of places where you can get vaccinated, including community clinics, marae, pop-up venues and pharmacies. We'll let you know when these are ready in your area.

3. Be prepared

Your first vaccination

Once you have your booking, note the time of your first vaccination here:

Remember to share any existing health conditions you have or medications that you take with your vaccinator.

Your second vaccination

After you've had your first vaccination, make sure your second dose is booked. Note your second appointment time here:
