

Wear a face covering on public transport and planes

Place it on safely

Wash or sanitise your hands then put mask or face covering over nose, mouth and chin - ensure it is comfortable and secure. Remember to clean hands again after removing.

Wear throughout entire journey

Avoid touching your face, the front of face covering, or removing face covering while on board.

Regularly wash or dispose of carefully

Dispose of single use masks in a waste bin, or wash and dry your reusable face covering often.
